Presented to the b2i Advisory Committee  
on **DATE**, 2024

# Bridge to Independence Extended Foster Care Program (commonly called b2i)

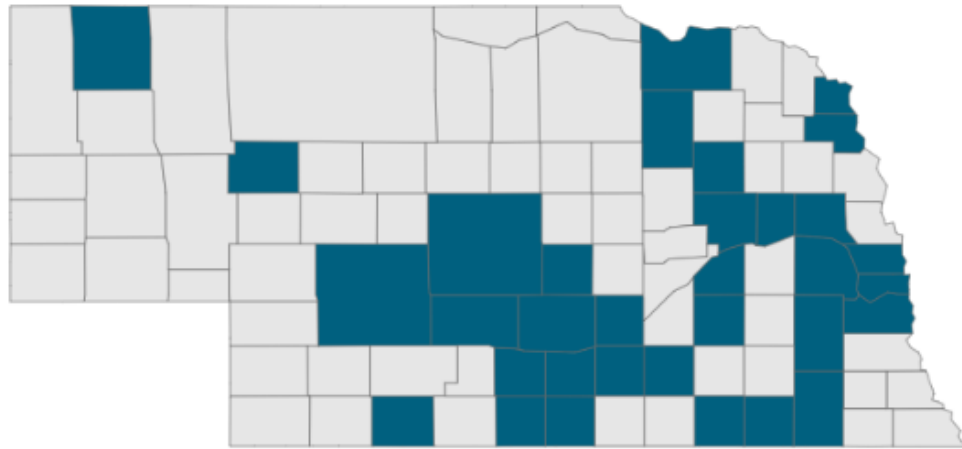

- The Nebraska Bridge to Independence Program (b2i) was designed to provide specific state supports to qualifying young adults ages 19 and 20 who were in foster care and opt to enroll. It is a short-term program that ends supports on the participant's 21<sup>st</sup> birthday.
- Young adults must meet eligibility criteria related to education and/or employment unless they are unable to complete criteria due to documented medical conditions.
- They must maintain monthly contact with an independence coordinator who helps them develop and modify their transitional living plan and connects them to available resources, in addition to helping them make progress on their personal goals.

# B2I Case Reviews by FCRO

- The Foster Care Review Office (FCRO) conducts monthly reviews on a sample of current b2i participants.
- Data is collected on specific goals and progress toward each goal the young adult has selected or is working on, as well as some basic demographic information. In addition, overall progress toward independent living is evaluated by FCRO staff.
- In Calendar Year 2023 (CY2023) the FCRO Research Team completed a sample of **199 b2i case reviews.**

# Bridge to Independence: Progress on Goals

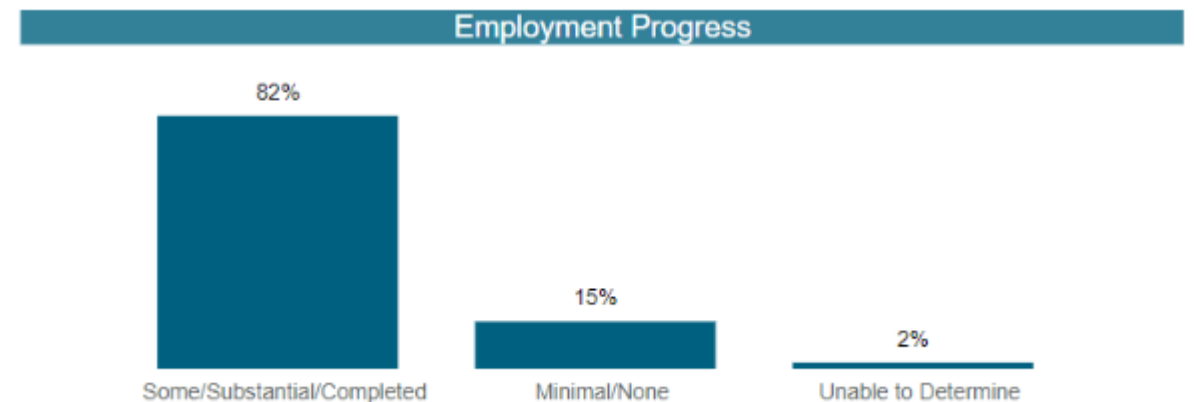

The most common goal selected by young adults was **transportation** (95%). Goals in this area may include learning to drive, obtaining a driver's license and insurance, obtaining and maintaining a vehicle, or learning to use public transportation (where available).

- Progress was found for 78% of the young adults, with 40% having completed their goal.
- 71% of females were showing progress compared to 87% of the males.
- 81% of white young adults were showing progress compared to 75% for young adults of color.

Most young adults in the b2i program had an **employment** goal (94.5%).

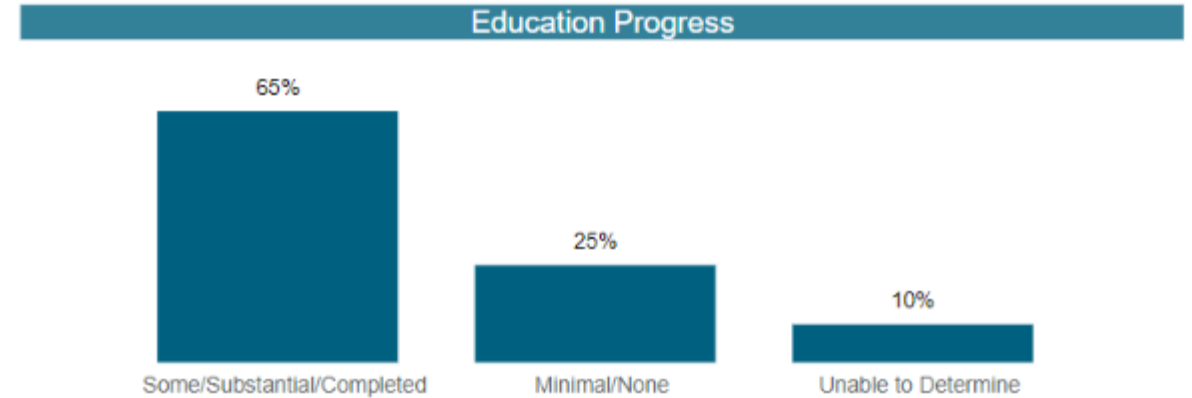

- 82% of those with this goal were making some/substantial progress or had completed their goal.
- 81% of females were showing progress compared to 84% of the males.
- 78% of white young adults were showing progress compared to 85% for young adults of color.

# Bridge to Independence: Progress on Goals (Cont.)

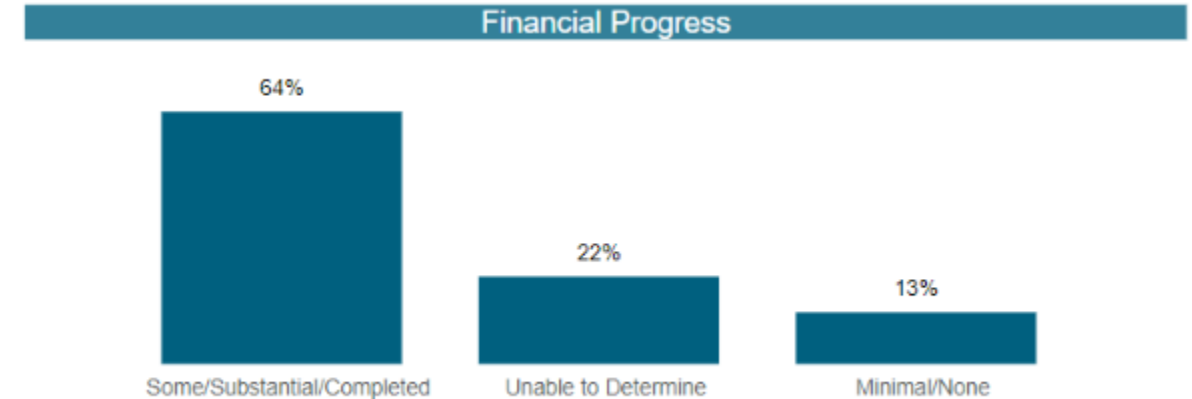

**Education** is a common goal, selected by 71.9% of the young adults reviewed.

- 65% with an education goal were making progress.
- 65% of females were showing progress compared to 67% of the males.
- 66% of white young adults were making progress compared to 64% for young adults of color.

Over half of the young adults reviewed (60.8%) had a goal related to **finance**.

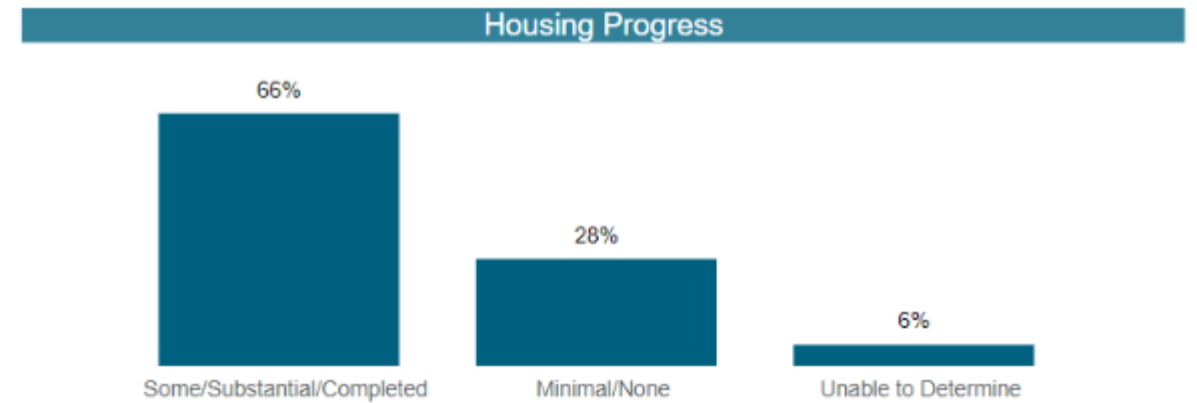

- 64% with a finance goal were making progress.
- 65% of females were showing progress compared to 62% of the males.
- No differences were found between young adults of color and white young adults.

# Bridge to Independence: Progress on Goals (Cont.)

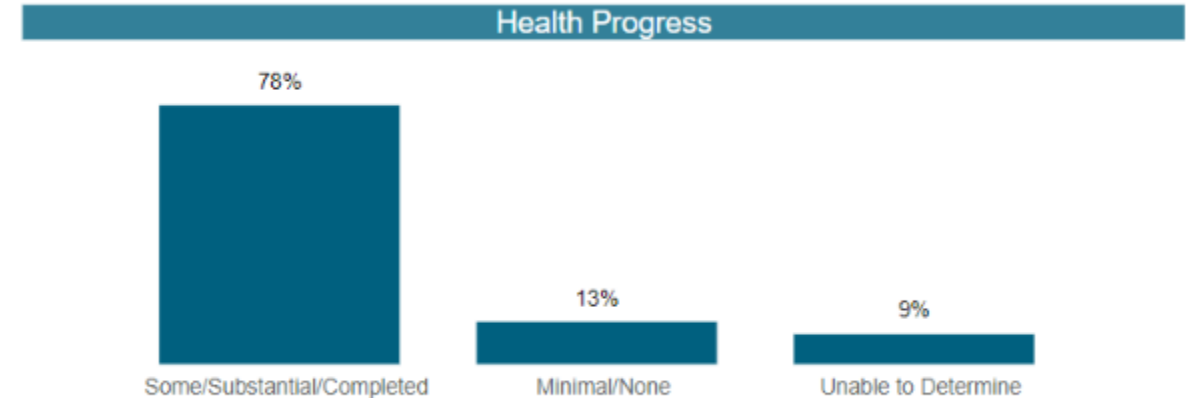

Many (44.7%) had a goal related to **housing**. Often this related to saving towards having their own apartment or other housing options.

- 66% had made progress towards their goal.
- 68% of females were showing progress compared to 63% of the males.
- 67% of white young adults were showing progress compared to 65% for young adults of color.

A goal related to **health** was selected by 39.2% of the young adults. Health goals commonly include attending therapy, consistently taking medication, and working to improve their overall wellness.

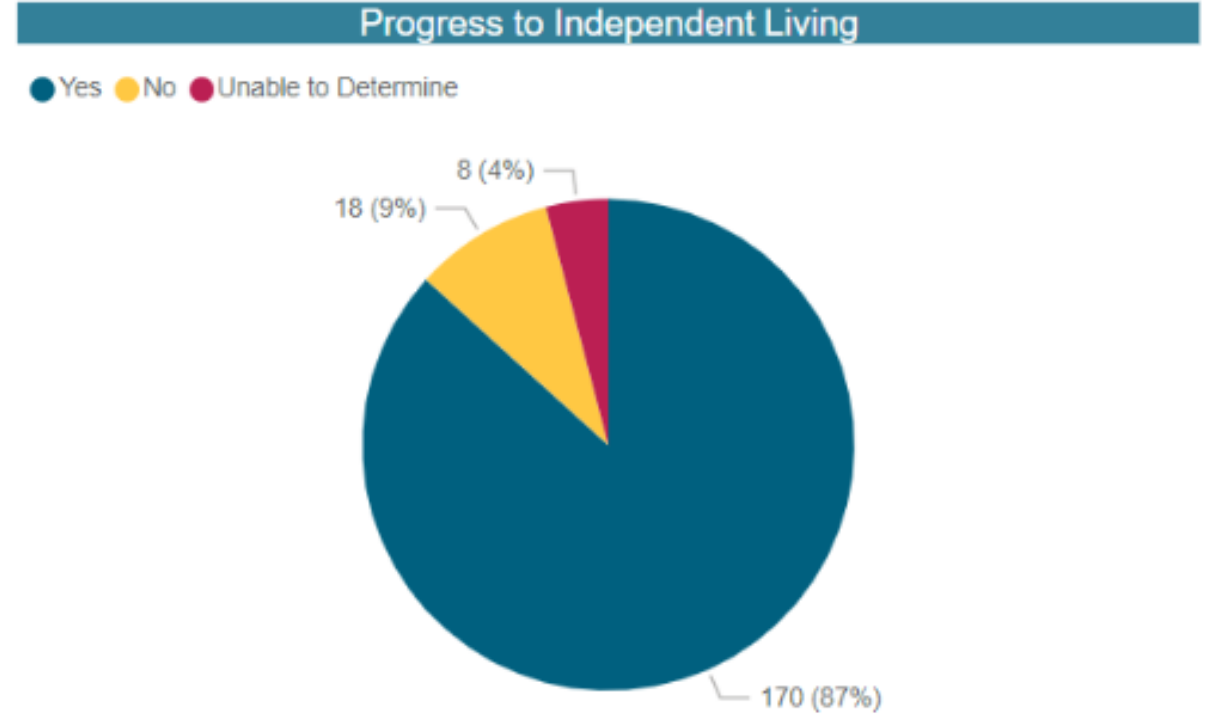

- 78% had made progress towards their goal.
- 75% of females were showing progress compared to 85% of the males.
- 73% of white young adults were showing progress compared to 83% for young adults of color.

# Bridge to Independence: Overall Progress

The FCRO considers a b2i participant's goals and progress levels for each aspect of skill building and support when determining the young adult's **overall progress** in the program.

- Most (87%) of the reviewed b2i participants were making progress to "independent living".
- 85% of females were showing progress compared to 89% of the males.
- 86% of white young adults were showing progress compared to 87% for young adults of color.

# Bridge to Independence: Overall Progress Factors

More **removals** may decrease the likelihood of making progress as a young adult.

- 91% of the young adults who had been in care only once were making overall progress as compared to 83% in the 2 or more times in care category.

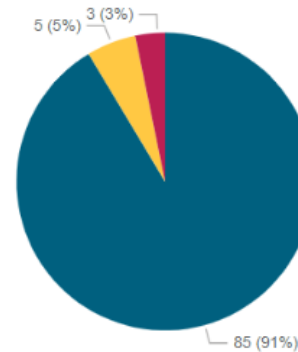

The more **disruptions** the young adult had experienced in childhood, the less likely they were to be making progress toward independence.

- 97% of young adults who had fewer than four placements were making progress compared to 82% of those with four or more out-of-home placements during their childhood.

## 1 Time in Care as a Child

# Key Influencers on Progress

When young adults had **10 or more placements** as a minor in out-of-home care, they were **9.7x** as likely to **not have a reliable support system**.

Young adults **without a reliable support system** were **6.1x** as likely to have **unstable housing**.

Young adults who did **not have stable housing** were

**10.1x**

as likely to **not be making overall progress**.
